Seychelles has launched construction of its first utility-scale floating solar power plant, a 5.8MW project in the Providence Lagoon on Mahé Island. It ...

Visit Seychelles is the new official Seychelles Islands mobile application where potential visitors can explore what the islands have to offer. Visitors can plan their trip, view travel essentials and choose ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

The Seychelles is an archipelago of 115 islands in the Indian Ocean, off East Africa. It's home to numerous beaches, coral reefs and nature reserves, as well as rare animals such as giant Aldabra ...

Operational since Q2 2023, this \$420 million hybrid facility combines 180MW solar PV with 76MW/305MWh battery storage - making it Sub-Saharan Africa's largest integrated renewable ...

Qair, which recently secured funding for a hybrid solar and storage project in Mauritius, is expanding its portfolio across the Indian Ocean region. Institutional support from FEI positions ...

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new clean energy ...

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...
