Installation scope: Outdoor electrical cabinets are used in power distribution networks, controlling motors working independently or according to technological processes. The cabinet can be operated ...

They are manufactured using high-quality galvanized steel sheets, insulation wool, high-temperature resistant EPS or PU materials, featuring a double-layer thickened outer shell for a longer service life.

One cabinet per site is sufficient thanks to ultra-high energy density and efficiency. The eMIMO architecture supports multiple input (grid, PV, genset) and output ...

The Delta outdoor cabinet is the choice from the tropics to the arctics when space is scarce or site density needs to be increase cost-effectively. The Delta outdoor series offers several size options, ...

The Delta outdoor cabinet is the choice from the tropics to the arctics when space is scarce or site density needs to be increase cost-effectively. The Delta outdoor series offers several size ...

Designed for outdoor deployment, the cabinet features weather-resistant construction, efficient ventilation or air conditioning, and options for battery and DC distribution integration. With ...

Integrates photovoltaic and wind energy to reduce carbon emissions and lower energy operating costs. Wall-mounted and pole-mounted installation is facilitated by compact design, making it ...

Our main products include prefabricated substations, high and low voltage switch cabinets, electrical distribution box, distribution and other electrical equipments, as well as ...
