-----

If the battery SoC falls below the SoC low-limit for more than 24 hours, it will be slow-charged (from an AC source) until the lower limit has been reached again.

Frustrated by inaccurate battery readings? Fix SOC drift in your off-grid ESS with our expert guide on causes, fast fixes, and proper SOC calibration.

Do you want the battery to not charge above 90%? Or not fall below 90%? I'm not clear. There is a Max SoC setting but it only applies to charging from the grid, if there is enough solar PV ...

Learn what SOC (State of Charge) means in a solar system, how battery SOC impacts performance, and how to monitor the state of charge of the battery for better efficiency and lifespan.

When the load is higher than power coming from the solar chargers, the battery is discharged until minimum SOC is reached. As expected, the ESS ...

Discover how to fix solar battery over discharge with our comprehensive guide. Gain useful insights on prevention and optimal performance.

Discover how to identify and fix solar battery over discharge in our comprehensive guide. Learn the symptoms, causes, and proactive strategies to enhance your battery's longevity and ...

I'm a bit confused about the best SOC settings for the battery bank. Previously forum members were stating not to go below 20% SOC as that was not good for battery longevity.
