AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island ...

Why is El Salvador a big importer of electricity? El Salvador currently imports about one-quarter of the country"s total electricity, making it the largest importer of electricity in Central America. Government ...

Coupled with battery storage, solar energy can be used during nighttime and on cloudy days. In rural areas and off-grid communities, solutions like these are highly sought after because ...

This technology allows solar energy to be stored during the day and injected into the system at night during peak demand hours, and is one of the most innovative and necessary solutions to alleviate ...

These services are provided by a team of world-class operators with support from AES El Salvador. Thanks to our global and local experience, we make reliability and timely response available to you, ...

Designed to optimize energy reliability and operational efficiency for industrial clients, the project leverages proprietary liquid-cooling technology to ensure peak performance in El...

Discover how new solar and wind projects are transforming El Salvador"s energy landscape, reducing fossil fuel dependency and boosting renewable capacity by 2025.

El Salvador has experienced a remarkable 160-fold increase in solar energy generation capacity from 2015 to 2023, according to data from the Latin American Energy Organization (Olade).
