Application: Power plant or substation power for controlling, protection and automatic device, emergency lighting, communications, steam turbine DC oil pump and so on independent DC systems. It can ...

It can provide reliable power supply in the case of a power failure completely in plant or substation. The traditional DC systems connect battery pack and run with float charging mode. ...

This 48V DC power system integrates dual energy inputs (mains electricity and solar energy) in a Type 3 protection class cabinet (2000H × 700W × 1050mmD), designed for outdoor and ...

This 48V DC power system integrates dual energy inputs (mains electricity and solar energy) in a Type 3 protection class cabinet (2000H × 700W × 1050mmD), designed for outdoor and industrial ...

It is especially designed for telecom sites with advanced features: long lifespan, wide range of charging voltage, fast charging, intelligent management, and software anti-theft.

With this solar-powered solution, telecom operators can reduce their reliance on the grid and ensure uninterrupted communication services even in remote areas. This telecom cabinet is ...

This is a 48V DC power system integrating dual energy inputs of mains electricity and solar energy, adopting a Type 3 protection class cabinet (dimension: 2000H × 700W × 1050mmD), which is ...

It is especially designed for telecom sites with advanced features: long lifespan, wide range of charging voltage, fast charging, intelligent ...
