Designed for cell towers, data centers, and network equipment, our telecom battery systems provide reliable backup power, optimize energy use, and reduce costs.

Lithium-ion batteries are key to solar-powered telecom cabinets. They are small, light, and store energy well. Unlike older batteries, they hold ...

The Outdoor Cabinet Energy Storage System is a fully integrated solution that combines safe battery storage, intelligent power management, and weatherproof protection for solar and telecom applications.

It is integrated with lithium battery modules, an intelligent BMS, high-voltage protection, power distribution and thermal/fire control in a single weatherproof cabinet. Priced at 15-50 kWh capacities, ...

The Cabinet offers flexible installation, built-in safety systems, intelligent control, and efficient operation. It features robust lithium iron phosphate (LiFePO4) batteries with scalable capacities, supporting on ...

The ESS solution is a highly integrated, all-in-one, C& I Hybrid energy storage cabinet with multiple application scenarios. It has outstanding advantages such as intelligent charge and discharge ...

The cabinet is designed to house telecom equipment and features a robust solar panel array on the top, along with batteries and a rectifier system for energy storage and distribution.

Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection against water and dust, ...
