How much will Southeast Asia Invest in low-emissions power in 2025?

Investments into low-emissions power in Southeast Asia have steadily increased since 2021, and are expected to surpass USD 19 billion in 2025. However, this remains well below the potential implied by the region's resource base and its announced climate and energy targets.

What is expected WACC for offshore wind in Southeast Asia?

Expected WACC for offshore wind in Southeast Asia is the highest of technologies surveyed, due to a lack of demonstration projects and regulatory frameworks, limited grid infrastructure serving coastal regions with high wind potential, and supply chain uncertainty.

Why is infrastructure development important in Southeast Asia & South Asia?

Insights & Opportunities for Infrastructure Development in Southeast Asia and South Asia The world is at an inflection point to limit global warming and align with the 1.5°C pathway. Infrastructure plays a critical role in facilitating the transition in advancing Asia's journey towards a low-carbon future.
