The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives.

This project involves the designing and developing of an automated dual axis solar tracking system for domestic energy purposes. Moreover, demonstrates a prototype of the proposed ...

This article explores how tracking photovoltaic panel support systems are transforming the region's energy landscape, offering actionable insights for developers, businesses, and eco-conscious ...

Compare fixed-tilt, single-axis, and dual-axis solar trackers in Sri Lanka yield gains, cost, maintenance, and ROI insights to maximize photovoltaic performance

By combining real-time SCADA functionality with a modern IoT analytics platform, we have created a scalable, reliable, and future-ready solution that supports inverter ...

By partnering with global tier-one manufacturers, as well as selected local suppliers, we are able to offer high-quality and durable solar power solutions in Sri Lanka at the most affordable prices.

Sri Lanka's Panasian Power PLC has successfully completed the construction of a cutting-edge 5-MW solar power plant in Matara, Southern Province, which notably features an ...

Experience the benefits of an automatic solar panel tracking system with our Dual Axis Solar Panel Tracking Tracker Electronic Sun Track System. It is the perfect solution for homeowners ...
