Will Swedish government loans fund new nuclear power projects?

In the budget bill for 2026, the Swedish government has proposed a financial framework for companies seeking government loans to fund the construction of new nuclear power projects. The Ringhals site, where Vattenfall is proposing to construct SMRs (Image: Vattenfall)

How much will Sweden's nuclear power expansion cost?

In August 2024, a government commission found that Sweden's plans for a rapid expansion of its nuclear power capacity are likely to cost around 400 billion crowns (\$39bn, EUR36bn) and should be financed by a mix of government loans and price guarantees, a government commission has recommended.

Will new nuclear power benefit Swedish households and businesses?

"New nuclear power benefits Swedish households and businesses alike. The Ministry of Finance is prepared to accept applications for investment in nuclear power starting on 1 August. This is a historic opportunity for growth and transition," says Minister for Financial Markets Niklas Wykman. "A global race is under way for new nuclear power."
