A tense standoff between the Syrian Government and Kurdish-led forces in the country's northeast risks igniting wider instability just as Syria struggles to emerge from years of conflict and ...

In a government department in Syria, we installed multiple 100KW/215KW energy storage systems. These systems typically use photovoltaic power for charging and supplying loads, while also ...

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project - a \$120 million initiative aiming to stabilize the national grid while integrating solar farms ...

While a microgrid is in the on-grid mode, it can receive energy from the main grid, and the energy storage system should make the longest cycle life as its optimal goal, and choose the appropriate ...

People climb over the damaged al-Rashid Bridge, with some crossing on foot, after it was destroyed as Kurdish-led Syrian Democratic Forces withdrew, a day after government forces took ...

Russian President Vladimir Putin met his Syrian counterpart Ahmed al-Sharaa in the Kremlin on Wednesday for talks that were set to include the sensitive issue of Russia's future military ...

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC ...

These three parts form a microgrid, using photovoltaic power generation to store electricity in the energy storage battery. When needed, the energy storage battery supplies the ...
