The Canyon Creek Pumped Hydro Energy Storage Project, located 13 kms from Hinton, will feature a 30-acre upper reservoir and four-acre lower reservoir and will have a power ...

The project will enhance the country's electricity grid's ability to integrate a higher level of renewable energy by adding a 200MW/200MWh Battery Energy Storage System ...

The Georgian government has scaled back funding for its planned 200-megawatt energy storage facility, with the 2026 state budget allocating GEL 35 million instead of the previously ...

The Tbilisi Pumped Storage Project uses existing reservoirs like Turtle Lake as natural batteries. Water flows uphill using cheap night-time energy, then generates power during peak hours.

With Tbilisi's storage facilities now powering everything from electric marshrutkas to high-tech wine cellars, that bottled sunshine might just be Georgia's most valuable export yet.

The project aims to improve energy security, reduce Georgia's reliance on grid stability support from neighboring countries, and pave the way for greater private sector participation.

Enter the Tbilisi Energy Storage System Plant - the country's secret weapon against blackouts and fossil fuel dependency. This facility isn't just another industrial site; it's Georgia's ...

That's where hydrogen swoops in like a superhero. A recent Tbilisi pilot project achieved 72-hour continuous clean power supply using hydrogen storage paired with existing hydro infrastructure - ...
