---

The Windhoek project uniquely addresses what engineers call the "duck curve dilemma" - that awkward afternoon when solar overproduction threatens grid stability. By ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a battery ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a battery installation - it's a ...

As Namibia's capital Windhoek embraces renewable energy, battery storage systems have become the cornerstone of sustainable power infrastructure. These solutions address three critical challenges:

Discover how hydrogen energy storage solutions are transforming Windhoek's energy landscape and why EK's innovative technology is leading the charge.

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a ...

As Namibia's capital Windhoek embraces renewable energy, battery storage systems have become the cornerstone of sustainable power infrastructure. These solutions address three ...

The recent 54MW/54MWh hybrid storage project in Erongo Region - Namibia's first grid-scale battery installation - proves this desert capital isn't just blowing hot air about sustainable energy.
