Our research reveals that Asia Pacific (excluding China) hosts most Chinese overseas facilities, totalling over 70 GW of production capacity for cell and module. However, despite this ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

Meeting international energy and climate goals requires the global deployment of solar PV to grow on an unprecedented scale. This in turn demands a major ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest ...

Exports of solar power and wind power products totaled a combined US\$100.9 billion in 2022. The dollar total in 2022 for popular exported green or clean energy products results from a 73.9% expansion ...

Our research reveals that Asia Pacific (excluding China) hosts most Chinese overseas facilities, totalling over 70 GW of production capacity for cell ...

All non-carbon energy sources--including solar, wind, nuclear, hydropower, and geothermal--represented 41% of capacity (excluding storage) and 40% of generation in 2024.

Based on up-to-date data and information, this report explores the progress in diversifying the global solar PV supply chain through four sections. Section 1 provides an overview of the global solar PV ...
