What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Are all telecommunications support systems the same?

Not all support solutions are the same, and Purcell understands that each telecommunications network requires a variety of support systems to meet your needs and your budget. Purcell makes the decision easy, by offering specially engineered families of standard, modular, and configurable equipment cabinets to fit every deployment scenario.

Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

What materials can be used for a telecom pedestal enclosure?

Whether you need a telecom pedestal enclosure or a large cabinet with multiple doors, our team will create a design using your choice of stainless steel, carbon steel or lightweight aluminum. You can also choose from a wide range of optional features to include in your custom design, including:

Purcell makes the decision easy, by offering specially engineered families of standard, modular, and configurable equipment cabinets to fit every deployment scenario.

The racks and cabinets will typically be installed as stand-alone units in special purpose telecommunications equipment or collocation facilities however, the relevant requirements also apply ...
