What is a data center cooling enclosure?

Together, the IT rack enclosure and the data center cooling enclosure form an efficient closed-loop cooling system. POD enclosures protect equipment from physical and environmental conditions found in factories, warehouses and other edge computing locations. Power and data cables are separated from cooling lines, protecting them from moisture.

What is the SRP-r-c25 rack enclosure?

The SRP-R-C25's IT rack enclosure houses up to 44U of rack-mounted equipment on built-in rails. The cooling enclosure comes with a slim 25 kW in-row cooling unit (SRCOOLDXRW25) to help prevent equipment malfunctions due to overheating or fluctuating temperatures.

How does the srcooldxrw25 in-row precision cooling system work?

Power and data cables are separated from cooling lines, protecting them from moisture. The IT rack enclosure has locking front and back doors with clear acrylic windows that allow convenient visual monitoring of equipment. The SRCOOLDXRW25 in-row precision cooling system includes an outdoor condenser.

Buy a Eaton SmartRack Pre-Configured, Self-Cooling Modular Data Center - 2x 44U Racks, 25 kW AC Unit or other UPS Battery Backups at CDW

Deploy fast with the Eaton SRP-R-C25 Modular Data Center. Includes 44U rack, 25kW cooling unit, and remote monitoring. Ideal for edge and AI environments.

This SmartRack® Modular Data Center is composed of IT rack, cooling and service enclosures that form a performance optimized data center (POD). This solution reduces deployment ...

Discover the Eaton SmartRack Pre-Configured Modular Data Center featuring dual 44U racks and a 25 kW AC unit, designed for efficient cooling and quick deployment in edge computing environments.

The SRP-R-C25's IT rack enclosure houses up to 44U of rack-mounted equipment on built-in rails. The cooling enclosure comes with a slim 25 kW in-row cooling unit (SRCOOLDXRW25) to help prevent ...
