U.S. energy storage capacity will need to scale rapidly over the next two decades to achieve the Biden-Harris Administration's goal of achieving a net-zero economy ...

An "unbelievable appetite for clean energy" is pushing the developer of Gemini, the US's largest co-located solar-plus-storage power plant, to pursue ...

An "unbelievable appetite for clean energy" is pushing the developer of Gemini, the US's largest co-located solar-plus-storage power plant, to pursue opportunities of a similar scale.

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

Listed below are the five largest energy storage projects by capacity in the US, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

As of February, 12 US states have energy storage targets, the largest of which is in New York, which has a goal of 6 GW by 2030. In mid-2024, ...

The US startup Fermi has reserved a spot for solar power and energy storage in the 11-gigawat Project Matador campus in Texas.

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...
