Will Uzbekistan build a new energy system?

Thanks to such purposeful steps, we will undoubtedly build a modern energy system of a new type,- stated the Leader of our country. In conclusion, by pressing a symbolic switch, the President of Uzbekistan launched the operation of 42 energy facilities and the construction of 21 new projects.

Who invests in Uzbekistan's new energy projects?

Many of the new projects involve international companies from Saudi Arabia, Turkiye, the UAE, China, France and Qatar. Saudi Arabia's ACWA Power remains one of the most active investors. "Uzbekistan's energy mix is becoming greener every year," said Jon Zaidi, the company's Country Head.

How much electricity does Uzbekistan generate?

The forum brought together government officials, international companies and financial institutions. Over recent years, Uzbekistan attracted approximately EUR30 billion to the sector. As a result, it has added 9,000 megawatts of new capacity since 2017, with total electricity generation rising from 60 billion kilowatt-hours to 85 billion in 2024.

What is Uzbekistan doing to support the new infrastructure?

To support the new infrastructure, Uzbekistan is also commissioning 11 substations and building 420 kilometres of high-voltage transmission lines. "We have set two major objectives as our main priorities in this direction. The first is to ensure a reliable and uninterrupted energy supply for all sectors and regions.
