How big is Vietnam's data center market?

A recent report by Statista, a global business intelligence platform, shows that Vietnam's data center market revenue is projected to reach approximately \$2.2 billion in 2025. The market is forecast to grow at an annual rate of approximately 3.7% from 2025 to 2029, and reach roughly \$2.6 billion by 2029.

How many data centers are there in Vietnam?

In addition, telecom developers and operators are also exploring options to build decentralized, low-latency data centers in second-tier cities, to cater to growing demand for edge computing in support of Internet of Things, 5G, and Smart Cities. A recent report by Vietnam MOST shows 41 active data centers with a total power capacity of 221 MW.

Will data storage requirements increase demand in Vietnam?

In addition, local data storage requirements set by Vietnam's Personal Data Protection Law, which was ratified by its National Assembly in June 2025 and will take effect in January 2026, are expected to increase demand for data storage services provided by data center operators.

Is Vietnam a good place to invest in data centers?

Regulatory reforms allowing 100% foreign ownership of data centers, combined with new domestic data storage requirements, make Vietnam one of the most attractive emerging markets in Asia for U.S. firms seeking entry or expansion.

Vietnam's rapidly expanding data center market creates strong commercial opportunities for U.S. suppliers of infrastructure equipment, software, and related services.

The Vietnam data center rack market is expected to grow at a CAGR of over 10% over the next five years. This growth is being driven by the ...

Vietnam Data Center Rack Market size was valued at \$ 0.42 Bn in 2024 and is expected to reach \$ 1.

Vietnam's strategic position in Southeast Asia has positioned it as a critical hub for data center development, with rack infrastructure serving as the backbone of modern computing facilities.

Increased expansion of data centers in Vietnam to meet the growing volume of data, demand for robust racks among cloud service providers, and growth of edge computing which fuels the need for ...
