How do I program the battery capacity of my ferrups rack mount ups?

If your FERRUPS Rack Mount UPS is configured to use an external battery cabinet, you must program the battery capacity in ampere-hour (Ah) for the total number of battery packs used in the UPS. If you purchased one of the FERRUPS Rack Mount battery pack options available from Eaton, select the Ah value from Table 2.

Can a ferrups rack mount ups communicate with a computer?

The FERRUPS Rack Mount UPS is capable of full-duplex communication and can communicate with a computer, a Local Area Network (LAN), or a multi-user computer system. If your system comes with UPS monitoring and automatic shutdown software, the FERRUPS Rack Mount UPS can communicate with that software.

How many operating modes does the ferrups rack mount ups have?

There are four UPS operating modes: Off Auto Line Condition Inverter On (on battery) The FERRUPS Rack Mount UPS selects the appropriate operating mode automatically; however, there may be times when you need to set the operating mode manually from the control panel. Notice that names of the operating modes appear in red on the bottom of keys 1-4.

What alarms does the ferrups rack mount ups have?

The FERRUPS Rack Mount UPS has high AC and low AC output voltage alarms, as well as an overload alarm. If the AC output voltage falls below the low AC output voltage alarm setpoint, the UPS sounds an alarm after 5 seconds. If the AC output voltage falls below the low AC output shutdown setpoint, the UPS sounds an alarm and shuts down.
