What is the Wellington Battery energy storage system?

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future electricity system. Construction of the project will be undertaken by AMPYR's preferred construction contractors Fluence and RJE Global.

What is the Wellington Stage 1 battery energy storage system?

The Wellington Stage 1 Battery Energy Storage System (or BESS) will have a capacity of 300 megawatts and store 600 megawatt-hours of energy and is expected to start working in 2026. Once running, this battery will help make renewable energy more reliable and affordable for homes and businesses, especially as more industries need clean power.

What is the Wellington Bess project?

"The Wellington BESS will contribute towards supporting Australia's journey towards a more sustainable and reliable energy future," said RJE Global in a statement. The project sits within the Dubbo Regional Council LGA and is part of broader efforts to boost storage infrastructure as renewable penetration increases across the NEM.

Who is delivering the Wellington Stage 1 Bess project?

The project will be delivered by United States-based Fluence Energy, using its Gridstack energy storage product. Fluence has also entered into a 20-year operational service contract to service and maintain the Wellington Stage 1 BESS, with revenues to be optimised by the company's Mosaic and Nispera software platforms.

Ampyr announced it has achieved financial close for the \$340 million (USD 221 million) first stage of the Wellington battery energy storage system (BESS) project to be built about three ...

Fluence has a strong track record in Australia, with four battery energy storage systems currently in operation, another two entering operations in the next few months, and ...

Project Summary. The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage ...

Ampyr announced it has achieved financial close for the \$340 million (USD 221 million) first stage of the
