A recent article published in Renewable and Sustainable Energy Reviews unpacks how energy storage can be strategically integrated into electric rail infrastructure to decrease emissions, ...

New project of tallinn energy storage company Evecon and Corsica Sole are joining forces in the Baltic Storage Platform joint venture to build and operate high-capacity battery storage power ...

But here's the kicker - it's not just about energy storage. This project pioneers vehicle-to-grid (V2G) integration with Tallinn's electric bus fleet, creating what engineers call a "bi-directional power ...

This article explores how Estonia's capital drives innovation, meets global demand, and supports industries from smart grids to commercial power management. Discover trends, case studies, ...

From AI-driven load balancing to experimental peat batteries, Tallinn Power Storage proves that sometimes, the best solutions come from unexpected places. Even if ...

Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's thermal energy to supply linked buildings with ...

But here's the kicker - it's not just about energy storage. This project pioneers vehicle-to-grid (V2G) integration with Tallinn's electric bus fleet, creating what engineers call a "bi-directional ...

"Tallinn Old City Harbour is one of the busiest ports in Europe, therefore switching to renewable energy and creating shore power capacity for the Port of Tallinn is a significant step in ...
