What is Vodacom & Orange doing in Africa?

Vodacom and Orange have joined hands to form, a first of its kind, rural towerco partnership in Africa. Through this partnership, the companies will collaborate to build, own, and operate solar-powered mobile base stations in underserved areas of the Democratic Republic of Congo (DRC).

What is mobile internet penetration in the DRC?

Mobile Internet penetration in the DRC is at 32.3% and Orange and Vodacom's announcement to construct new base stations in the country aligns with the country's new vision for the digital economy as included in the National Digital Plan Horizon 2025 adopted in 2019.

How can the DRC bridge the digital divide?

Deploying and operating networks, particularly in deep rural areas, continues to be a significant challenge in the DRC. To bridge the digital divide and expand network coverage in underserved communities, the companies have pledged to jointly construct up to 2,000 new solar-powered base stations over six years, using 2G and 4G technologies.

How can Vodacom improve rural connectivity?

Collaborating with Vodacom by sharing both passive and active infrastructure is the most effective approach to fulfilling our commitment to accelerating connectivity access for everyone, including rural areas, while minimizing our environmental footprint," says Orange Middle East and Africa CEO, J&#233;r&#244;me H&#233;nique.
