How many kW does a data center rack need?

12 kW per rack by 2014, according to data collected by the Data Center Users Group, sponsored by Vertiv™. The need now exists for taller, wider and deeper racks to accommodate the changes in IT equipment and densities. As data center managers strive to make use of valuable space, racks are more fully filled than ever.

What types of server racks are available?

Manufacturer of standard and custom server racks for data center environment. Open compute (OCP) and seismic server racks, tandem dual, two-post equipment and dual swing wall mount racks are available. Offered in 78 in. to 88 in. heights, 24 in. to 30 in. widths and 42 in. to 48 in. depths.

How do you plan a data center rack?

Hot aisle/cold aisle configuration. The key to data center rack planning is to think about flexibility and adaptability. Needs will continue to evolve, and racking solutions must be able to evolve with them. The data center must be able to adapt to each individual rack environment and rack zone. Similarly, the rack must adapt to the room.

What types of racks are available?

Distributor of floor and wall server racks for mounting patch panels, hubs, routers, and telephone equipment. Types include adjustable 4-post, 2-post, V, swing out, pivot frame, side load, and open frame wall mount racks. Serves the aerospace, automotive, construction, electrical, food, military, oil and gas, and mining industries.
