By spreading the lifting points, the equipment minimises deformation and enhances control over large, flexible structures. Modulift equipment has ...

By spreading the lifting points, the equipment minimises deformation and enhances control over large, flexible structures. Modulift equipment has been successfully deployed in ...

This system allows the nacelle to be affixed to each turbine tower at a much lower height than is currently the case, improving the safety of each lift and allowing customers to choose from a larger ...

Our lifting solutions designed for wind power operations, including swivel lifting points and PSA anchors for blades, nacelles, and towers. Ensure safety, ...

Our lifting solutions designed for wind power operations, including swivel lifting points and PSA anchors for blades, nacelles, and towers. Ensure safety, efficiency, and corrosion resistance in turbine ...

CLS Wind's system enables faster and more cost-effective maintenance, minimizing downtime and expediting revenue generation.

This system allows the nacelle to be affixed to each turbine tower at a much lower height than is currently the case, improving the safety of each lift and allowing ...

With our specialised heavy lifting solutions, custom designed lifting attachments, and high capacity material handling equipment, we are able to facilitate a seamless and efficient construction ...
