With projects in 20 countries, a 6GW+ project pipeline, and 1,600MW+ in operation and under/near construction, the company is rapidly expanding its investments in wind, solar, energy ...

There is growing investment interest in both on-grid and off-grid solar solutions, wind, and geothermal energy as Uganda moves towards a more sustainable and inclusive energy future.

Planned infrastructure includes high-efficiency solar modules optimized for tropical conditions, scalable battery architecture for flexible capacity, centralized monitoring and grid ...

Engineered for tropical and equatorial conditions, the proposed technology aims to optimize for grid stability, off-peak power delivery, and ...

With projects in 20 countries, a 6GW+ project pipeline, and 1,600MW+ in operation and under/near construction, the company is rapidly ...

The company produces advanced solar and energy storage systems for utility-scale, commercial, and off-grid applications, with manufacturing facilities in California, North Carolina, and Texas--all aligned ...

There is growing investment interest in both on-grid and off-grid solar solutions, wind, and geothermal energy as Uganda ...

Uganda's government has approved the development of a 100-MWp solar power plant with 250 MWh of battery energy storage to be delivered by ...
